Name : Baby Vedika Shrivastava Age/Sex : 1 year / F Wt. 8.8 kgs Date 08 MAY 2026

TO WHOMSOEVER IT MAY CONCERN

This is to certify that the infant(s) under the medical care of Dr. Manish Mittal, Senior Pediatrician & Neonatologist, were born extremely prematurely at 26 weeks of gestation at Artemis Hospital.

The infant(s) are currently undergoing active treatment, follow-up care, and continuous medical monitoring at Health First Nursing Home.

Due to extreme prematurity and the ongoing RSV (Respiratory Syncytial Virus) season, the infant(s) are at very high risk of severe respiratory infections and related complications. In view of this, RSV immunization is strongly medically advised as a preventive and life-saving measure, in accordance with standard pediatric and neonatology protocols.

The infant(s) are required to start administration of the RSV injection Beyfortus (nirsevimab-alip). The cost of this injection alone is approximately ₹39999 per vial, and multiple doses may be required depending upon the infant(s)' corrected gestational age, weight, and clinical condition.

In addition to RSV prophylaxis, the infant(s) will require further vaccinations, ongoing neonatal treatment, regular pediatric follow-ups, nutritional support, and supportive medical care over the coming months to ensure proper growth, immunity development, and overall health outcomes.

This certification is being issued to support the requirement for ongoing medical treatment, immunization, and financial assistance for the continued care of the infant(s).
